01 PROFILE

I turn incomplete product needs into connected interfaces, services and operational systems. My work spans typed full-stack delivery, identity boundaries and agent-aware tooling, with responsibility for what happens after something ships.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | Present

Own client products from requirements through React/TypeScript services, data and ongoing support.

Build tenant-aware shared services and access-controlled SaaS/AI integrations using MCP and authenticated boundaries.

Product Engineering and IT (Long-Term Contract) · NuPrice | Client engagement within Technomancy IT | 2019-2021

Built and operated marketplace-data ingestion, repricing rules, accounts, subscriptions and billing.

Owned customer support and technical operations across the application and its services.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Led the NOC team, handled engineering escalations and built tooling for hosting and colocation support teams.

Worked across AWS, Docker and recovery; ran SOC 1/SOC 2 audits and documented operating procedures.

Systems / Software Engineer · Office Evolution | 2014-2015

Connected CRM, provisioning, onboarding and service operations through centralized applications.

Worked with the CEO and CIO to turn cross-location business handoffs into shared workflows.

03 SELECTED WORK

Technomancy platform | Connected product and AI context · Own practice and client-operations product

Joined support, CRM and billing through tenant-aware TypeScript/PostgreSQL services.

Modeled interconnected records with indexed retrieval, analytics and batch evaluation paths.

Kerf | Agent-oriented TSX architecture · Own framework, early development

Built a TypeScript/TSX framework with its own compiler, routing, authentication and data layer.

Develop reusable UI contracts and actionable compiler diagnostics for coding agents.

ProofMark | Explicit identity and workflow state · Completed client engineering contribution

Designed document signing across identity, routing, audit history and integrations.

Connected React interfaces, APIs and PostgreSQL with explicit state and fallback paths.

04 CAPABILITIES

React / TypeScript / Node.js / full-stack architecture · PostgreSQL / relational and graph modeling / API integration · MCP / access-controlled connectors / structured AI review gates · Tenant-aware identity / AWS / operational diagnosis and recovery
